

Thank you for purchasing our stainless steel tank we appreciate your business

How to Order Your Custom Stainless Steel Tank.

We carry almost every design for GM, Ford and Mopar vehicles. If we don't, you can ship us your tank and we can duplicate it. Our tanks are supplied with either stainless steel straps or brackets depending on the fuel tank. When you order your tank let us know your application, EFI or Carb. Most EFI tanks call for different fuel pump applications due to horsepower. Our tanks also fit after-market chassis and suspension applications.

We can also build a custom tank from your hand drawing, cad drawing or bar napkin. From there we will email you a pdf proof of the drawing before we start assembling the tank.

If you need to ship your tank to us, please wash the fuel out with Simple Green and water. Then box the tank, shipping companies will not ship the tank unless it is boxed. If you have made a cardboard mock up of the tank, ship it to us and we will draw, send you a pdf for approval before assembling the tank.

Call us at 915-760-4388 for quotes and orders, one of our staff members will help you.

For truck applications we offer side fill or center fill for the bed of the truck

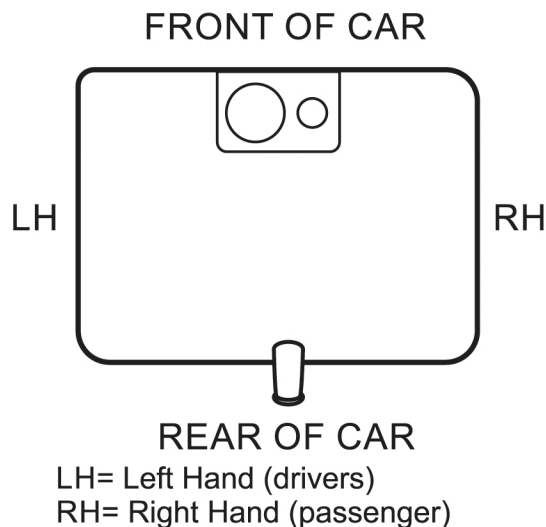

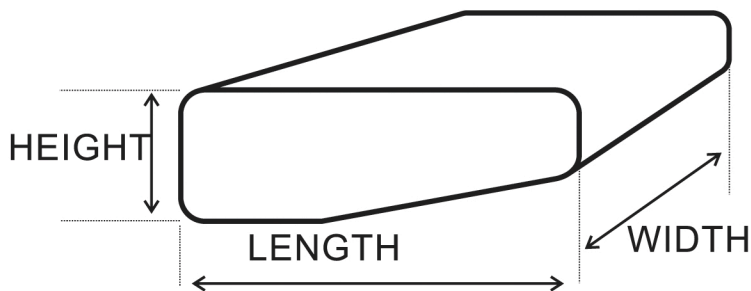

Side fill fuel tank.

Center fill fuel tank.

To calculate capacity $L \times W \times H =$ then / 231 this will give you U.S. gallons
